SUBJECT INDEX: VOLUME 51

Accelerators
Energy dependence of the dose equivalent on the primary proton energy--comparison of Casim and Moyer model calculations 812
Neutron leakage through an Fe shield at an accelerator 723
Radioactivity, residual, in a cyclotron and its surroundings 337
Accident analysis
After accidental gamma irradiation from a Co-60 source, long-term follow-up 601
Airborne radioactive gases inside a nuclear reactor containment building, the exposure rate from, a Monte Carlo program to calculate 699
Manufactured products, radioactive contamination of 409
Possible hazard: pressure build-up in sealed ampoules of radionuclides in aqueous solution, comment on 147
Accidents, power reactor
Airborne radioactive gases inside a nuclear reactor containment building, the exposure rate from, a Monte Carlo program to calculate 699
Accidents, transport
Manufactured products, radioactive contamination of 409
Actinides
Actinides, bone-seeking, and Ra, reply to Wrenn, Lloyd, Mays and Taylor concerning the carcinogenicity of 679
Bone sarcoma induction, relative effectiveness of alpha emitters for 677
Americium
Absorption of ingested, in newborn guinea pigs 804
Radioassay of Pu or Am in biological samples, a low-energy photon detector for 797
Annual limit on intake
Lowering the annual limit on intake for I-125 and I-131, more comments on 682
Should the annual limit on intake for I-125 and I-131 be lowered, comments on 682
Attentuation
Photon dose build-up factors in C and polyethylene for a point isotropic source 249
Australia
Activity median aerodynamic diameters, final product dust, in the product packing areas of two Australian U mills 352
Austria
Titles and authors of papers presented at the meeting of the Health Physics Section of the Roland Eotvos Physical Society of Hungary--Computer-aided Methods in Radiation Protection, 22-25 October 1985, Budapest 391

Bioassay
Health and safety aspects of nuclear weapons testing, historical perspectives on selected, review article 17
Radioassay of Pu or Am in biological samples, a low-energy photon detector for 797

Build-up factor
Photon dose, in C and polyethylene for a point isotropic source 249
Building materials
Used in the Netherlands, radioactivity in, a proposed standard for 661

Calibration
Counting losses in gamma-ray spectrometry not eliminated by Dead-time correction circuitry 380
Of charcoal detectors, Rn chamber for 135
Of survey instruments, in high-energy proton fields 555
Survey instrument calibration, reply to D. W. O. Rogers regarding 556
Cancer
Bone sarcoma induction, relative effectiveness of alpha emitters for 677
Evaluation, epidemiological, of radiation risk using populations exposed at high doses, review article 269
Histopathologic findings of lung cancer in Navajo men: relationship to U mining 365
Radium and bone-seeking actinides, reply to Wrenn, Lloyd, Mays and Taylor concerning the carcinogenicity of 679
Radon exposure, assessing the risks of, the influence of cigarette smoking 163
Risk of lung cancer at low doses of alpha particles 457
Carbon-14
Incineration and monitoring of low-level wastes at a biological research institution 469
Carcinogenesis
Bone sarcoma induction, relative effectiveness of alpha emitters for 677
Distribution functions, cumulative empirical; and models, risk projection, for radiation carcinogenesis 447
Human lymphocytes *in vitro*, measuring damage after low-level radiation exposure using prematurely condensed chromosomes 672
Incidence of late radiation effects, logistic estimate of the final 357
Radium and bone-seeking actinides, reply to Wrenn, Lloyd, Mays and Taylor concerning the carcinogenicity of 679
Risk of lung cancer at low doses of alpha particles 457
x rays, prenatal, further tests of data from the Oxford Survey of Childhood Cancers 369
Cesium
In the Hudson River Estuary, comparative pathway analysis of, environmental measurements and regulatory dose assessment models 295
Chelation
DTPA therapy, effectiveness of, when administered intragastrically or intraperitoneally to remove Pu from adult or neonatal rats 641
Chromosome aberrations
Human lymphocytes *in vitro*, measuring damage to after low-level radiation exposure using prematurely condensed chromosomes 672
Cigarettes
Histopathologic findings of lung cancer in Navajo men: relationship to U mining 365

Cigarettes (continued)
Radon exposure, assessing the risks of, the influence of cigarette smoking 163
Coal
Health effects of Rn and radioactive emissions (comments on life saving by nuclear activities) 551
Health effects of Rn and radioactive emissions (reply to comments on life saving by nuclear activities) 554
Cobalt-57
Inhaled aerosols in beagles, metabolic fate of 773
Cobalt-60
After accidental gamma irradiation from a Co-60 source, long-term follow-up 601
Calibrations, survey instrument, in high-energy photon fields 555
Survey instrument calibration, reply to D. W. O. Rogers regarding 556
Computer calculations
Simulations of nuclear reactions by protons with incident energies of 250, 300 and 500 MeV in a human body 227
Contamination, external
Health and safety aspects of nuclear weapons testing, historical perspectives on selected, review article 17
Radiological impact of coal-fired plants, influence of source-term and environmental parameters on sensitivity analysis of 61
Testing at the Nevada Test Site, historical estimates of external gamma exposure and collective external gamma exposure from, test series through Hardtack II, 1958 35
Contamination, internal
Absorption of radionuclides through wounded skin 138
Accidental internal radionuclide deposition of Ir-192 and Sm-153, gamma-camera measurement of 349
Calibration phantom, inexpensive and multipurpose, for in-vivo measurements of 809
DTPA therapy, effectiveness of, when administered intragastrically or intraperitoneally to remove Pu from adult or neonatal rats 641
Health and safety aspects of nuclear weapons testing, historical perspectives on selected, review article 17
Intake of Ra-228 by early Ra dial workers in Illinois, estimation and potential radiobiological significance of 313
Radiological impact of coal-fired plants, influence of source-term and environmental parameters on sensitivity analysis of 61
Testing at the Nevada Test Site, historical estimates of external gamma exposure and collective external gamma exposure from, test series through Hardtack II, 1958 35
Corrections
Correction for "Biometric estimation of chest wall thickness of females," Health Phys. 49, 419-424. 395
Correction for "Comparison of the carcinogenicity of radium and bone-seeking actinides," Health Phys. 46, 1241-1258. 815
Correction for "Comparison of the ICRP and MIRD models for Fe metabolism in man," Health Phys. 49, 211-219. 255
Correction for "Dose distribution from a degraded Co-60 gamma field," Health Phys. 50, 493-507. 685
Correction for "Drinking-water contribution to natural background radiation," Health Phys. 50, 33-47. 395

Counting efficiency
Radon-220 concentrations in the field, a method for determining 343
Curium-244
Lung clearance and translocation of Pu-239 and Cm-244 in rats following inhalation individually or as a mixed oxide 633

Detector, charcoal
Calibration of, Rn chamber for 135
Detector, germanium
Portable, intrinsic gamma-ray detector, calibration and field testing of, using point sources 53
Detector, radiation
Low-energy photon, for the radioassay of Pu or Am in biological samples 797
Dogs
Bone sarcoma induction, relative effectiveness of alpha emitters for 677
In beagles, metabolic fate of inhaled Co aerosols 773
Radium and bone-seeking actinides, reply to Wrenn, Lloyd, Mays and Taylor concerning the carcinogenicity of 679
Dose
Pathway analysis, comparative, of radiocesium in the Hudson River Estuary: environmental measurements and regulatory dose assessment models 295
Dose assessment
Quantification of source terms in 385
Dose distribution
ICRP dose limitation recommendations, a study of worker dose distributions with respect to 579
Dose equivalent
Intake and committed dose equivalent, comparison of, based on annual dose equivalent and committed dose equivalent for a nuclide of intermediate effective half-life 207
Dose, absorbed
Absorbed dose rates from semi-infinite hemispherical volumes of Xe-133 107
Dose, collective
Concepts of Collective Dose in Radiological Protection by Bo Lindell (book review) 251
Estimating doses, individual and collective, to groups with 'less than detectable' doses, a method for use in epidemiologic studies 437
Dose, genetically significant
Estimation of, from diagnostic nuclear medicine examinations in the United States: 1980 377
Dose, population
Genetically significant dose, estimation of, from diagnostic nuclear medicine examinations in the United States: 1980 377
Dosimetry
The Dosimetry of Ionizing Radiation (Vol. 1), edited by Kenneth R. Kase, Bengt E. Bjarngard and Frank H. Attix (book review) 683
Dosimetry, biological
Human lymphocytes in vitro, measuring damage to after low-level radiation exposure using prematurely condensed chromosomes 672
Dosimetry, personnel
Calibration tardiness alarm for a radiation survey meter 382

Dosimetry, thermoluminescent
Attaching thermoluminescent dosimeters to small mammals, an alternative technique for 245
Dosimetry, gamma radiation, using NaCl:Ba(T) thermoluminescent phosphor 127
Surgically implanting thermoluminescent dosimeters in small mammals, effects of 142
DTPA
DTPA therapy, effectiveness of, when administered intragastrically or intraperitoneally to remove Pu from adult or neonatal rats 641

Emissions, atmospheric
Radiological impact of coal-fired plants, influence of source-term and environmental parameters on sensitivity analysis of 61
England
The Radman Guide to the Ionising Radiations Regulations--1985 by J.C. Collins, A.M. Freke, R.G.C. Brix, S.K. Stephenson (book review) 388
Epidemiology
Bone sarcoma induction, relative effectiveness of alpha emitters for 677
Estimating doses, individual and collective, to groups with 'less than detectable' doses, a method for use in epidemiologic studies 437
Evaluation of radiation risk using populations exposed at high doses, review article 269
Radium and bone-seeking actinides, reply to Wrenn, Lloyd, Mays and Taylor concerning the carcinogenicity of 679
Errata
Correction for "Biometric estimation of chest wall thickness of females," Health Phys. 49, 419-424. 395
Correction for "Comparison of the carcinogenicity of radium and bone-seeking actinides," Health Phys. 46, 1241-1258. 815
Correction for "Comparison of the ICRP and MIRD models for Fe metabolism in man," Health Phys. 49, 211-219. 255
Correction for "Dose distribution from a degraded Co-60 gamma field," Health Phys. 50, 493-507. 685
Correction for "Drinking-water contribution to natural background radiation," Health Phys. 50, 33-47. 395
Europium
Radioactivity, residual, in a cyclotron and its surroundings 337
Exposure, low-level
Radiofrequency radiation, effects of continuous low-level exposure on intrauterine development in rats 489
Exposure, occupational
Activity median aerodynamic diameters, final product dust, in the product packing areas of two Australian U mills 352
Commercial aviation crewmember radiation doses, comments on 386
Concentrations of Pb-210 and its states of equilibrium with U-238, U-234 and Th-230 in U miner's lungs 501
Evaluation, epidemiological, of radiation risk using populations exposed at high doses, review article 269
ICRP dose limitation recommendations, a study of worker dose distributions with respect to 579
Radium-228 intake by early Ra dial workers in Illinois, estimation and potential radiobiological significance of 313
Radon-220, measurement of, in exhaled breath of Th plant workers 737

Exposure, radiation
Building materials used in the Netherlands, radioactivity in, a proposed standard for 661
Evaluation, epidemiological, of radiation risk using populations exposed at high doses, review article 269
External gamma exposure and collective external gamma exposure from testing at the Nevada Test Site, historical estimates of, test series through Hardtack II, 1958 35
Health and safety aspects of nuclear weapons testing, historical perspectives on selected, review article 17
Indoor exposure rate due to cosmic-ray muons, effect of partition walls and neighboring buildings on 647
Radon-222 in U.S. homes and correlating factors, a national survey 175

Fallout
Neptunium-237 in human tissue samples 665
Plutonium from fallout in the Japanese diet 479
Federal Republic of Germany
Titles and authors of papers presented at the meeting of the Health Physics Section of the Roland Eotvos Physical Society of Hungary--Computer-aided Methods in Radiation Protection, 22-25 October 1985, Budapest 391
Fly ash
Radiological impact of coal-fired plants, influence of source-term and environmental parameters on sensitivity analysis of 61

Gastrointestinal tract
Absorption of ingested Pu and Am in newborn guinea pigs 804
German Democratic Republic
Titles and authors of papers presented at the meeting of the Health Physics Section of the Roland Eotvos Physical Society of Hungary--Computer-aided Methods in Radiation Protection, 22-25 October 1985, Budapest 391

Health effects
Of Rn and radioactive emissions (comments on life saving by nuclear activities) 551
Of Rn and radioactive emissions (reply to comments on life saving by nuclear activities) 554
Radon exposure, assessing the risks of, the influence of cigarette smoking 163
Health Physics Society
Health physics program content: master's level, guidelines for, special report 11
President's Message--1986, John W. Poston 7
Hiroshima
Populations exposed at high doses, epidemiological evaluation of radiation risk using, review article 269
History of physics
Historical perspectives on selected health and safety aspects of nuclear weapons testing, review article 17
Testing at the Nevada Test Site, historical estimates of external gamma exposure and collective external gamma exposure from, test series through Hardtack II, 1958 35

Hungary
Titles and authors of papers presented at the meeting of the Health Physics Section of the Roland Eotvos Physical Society of Hungary--Computer-aided Methods in Radiation Protection, 22-25 October 1985, Budapest 391

ICRP Publication 30
Determination of particle size for airborne UO_2 dust at a fuel fabrication work station, derivation and use of ICRP Publication 30 derived air concentration values, implication on 97
Illinois
Radium-228 intake by early Ra dial workers in Illinois, estimation and potential radiobiological significance of 313
Inhalation
Activity median aerodynamic diameters, final product dust, in the product packing areas of two Australian U mills 352
Decorporation of Sr-85 by radioabsorbents from the lungs of rats with bronchial disorders 539
Deposition and early disposition of inhaled $^{233}UO_2(NO_3)_2$ and $^{232}UO_2(NO_3)_2$ in the rat 755
Determination of particle size for airborne UO_2 dust at a fuel fabrication work station, derivation and use of ICRP Publication 30 derived air concentration values, implication on, 97
Generation of Li combustion aerosols for animal inhalation 117
Lung clearance and translocation of Pu-239 and Cm-244 in rats following inhalation individually or as a mixed oxide 633
Of Co aerosols in beagles, metabolic fate of 773
Of Np-237 in rats 745
Of U, acute accidental; a 38-year follow-up 609
Radon-220, measurement of, in exhaled breath of Th plant workers 737
Iodine
Health Physics Aspects of the Use of Radioiodines by David Prime (book review) 387
Iodine-125
Lowering the annual limit on intake for I-125 and I-131, more comments on 682
Should the annual limit on intake for I-125 and I-131 be lowered, comments on 682
Iodine-131
Health and safety aspects of nuclear weapons testing, historical perspectives on selected, review article 17
Lowering the annual limit on intake for I-125 and I-131, more comments on 682
Should the annual limit on intake for I-125 and I-131 be lowered, comments on 682
Italy
Uranium mine near Val Vedello, Italy; pre-operational survey of 197

Japan
Exposure rate, indoor, due to cosmic-ray muons, effect of partition walls and neighboring walls on 647
Fallout Pu in Japanese diet 479
Radon-220 concentrations in the field, a method for determining 343

Lasers
Laser safety, nonlinear properties of optical filters--implications for 95
Laser scanning ophthalmoscopes, safety aspects of 81
Lead-210
Concentrations of, and its states of equilibrium with U-238, U-234 and Th-230 in U miner's lungs 501
Liquid scintillation
Comparison of the counting characteristics of two cocktails 667
Counter design eases vial disposal problems 385
Radon-220 concentrations in the field, a method for determining 343
Lithium
Generation of Li combustion aerosols for animal inhalation 117
Louisiana
Radionuclide concentrations in soils and sediments 239
Lungs, rodent
Clearance and translocation of Pu-239 and Cm-244 in rats following inhalation individually or as a mixed oxide 633
Deposition and early disposition of inhaled $^{233}UO_2(NO_3)_2$ and $^{232}UO_2(NO_3)_2$ in the rat 755
Neptunium-237 inhalation in 745

Magnetic resonance
Introduction to Magnetic Resonance Imaging by Christopher J. Morgan and William R. Hendee (book review) 149
Screening, ferromagnetic, around a superconducting imager 545
Marshall Islands
Nuclear weapons testing, health and safety aspects of, historical perspectives on selected, review article 17
Mining
Design of dry or semi-dry U tailings disposal, radiation data imput for 329
Histopathologic findings of lung cancer in Navajo men: relationship to U mining 365
Uranium mill tailings, leaching of Ra-226 from, by sulfate-reducing bacteria 509
Uranium mine near Val Vedello, Italy; pre-operational survey of 197
Models
Evaluation, epidemiological, of radiation risk using populations exposed at high doses, review article 269
Models, risk projection, of radiation carcinogenesis; and distribution functions, cumulative empirical 447
Pathway analysis, comparative, of radiocesium in the Hudson River Estuary: environmental measurements and regulatory dose assessment models 295
Predicting the occurrence of Ra-228 in ground water 715
Monitoring, environmental
Attaching thermoluminescent dosimeters to small mammals, an alternative technique for 245
Determination of Rn-220 using activated C and a high-purity Ge detector 534
Pathway analysis, comparative, of radiocesium in the Hudson River Estuary: environmental measurements and regulatory dose assessment models 295
Radionuclide concentrations in Louisiana soils and sediments 239

Monitoring, environmental (continued)
Radon-220 concentrations in the field, a method for determining 343
Surgically implanting thermoluminescent dosimeters in small mammals, effects of 142
Monitoring, personnel
Calibration tardiness alarm for a radiation survey meter 382
ICRP dose limitation recommendations, a study of worker dose distributions with respect to 579
Monte Carlo
Energy dependence of the dose equivalent on the primary proton energy--comparison of Casim and Moyer model calculations 812
Exposure rate from airborne radioactive gases inside a nuclear reactor containment building, a Monte Carlo program to calculate the 699

Nagasaki
Populations exposed at high doses, epidemiological evaluation of radiation risk using, review article 269
Neoplasms
Neptunium-237 inhalation in rats 745
Neptunium
Inhalation of, in rats 745
Neptunium-237
In human tissue samples 665
Netherlands
Radioactivity in building materials used in the Netherlands, a proposed standard for 661
Neutrons
Leakage through an Fe shield at an accelerator, a study of 723
Notes on Radiation Effects on Materials by J.N. Anno (book review) 387
Nevada Test Site
Nuclear weapons testing, health and safety aspects of, historical perspectives on selected, review article 17
Testing at the, historical estimates of external gamma exposure and collective external gamma exposure from, test series through Hardtack II, 1958 35
New Mexico
Indoor and soil Rn measurements in the Albuquerque area 529
Seasonal variation of indoor levels at a location in the southwestern United States 427
Nuclear medicine
Comparison of the counting characteristics of two liquid scintillation cocktails 667
Diagnostic examinations in the United States (1980), estimation of genetically significant dose from 377
Possible hazard: pressure build-up in sealed ampoules of radionuclides in aqueous solution, comment on 147
Nuclear reactor fuel
Determination of particle size for airborne UO_2 dust at a fuel fabrication work station, derivation and use of ICRP Publication 30 derived air concentration values, implication on 97
Radiological risk of coal-fired plants, sensitivity analysis of the influence of source-term and environmental parameters on the 61
Nutrition pathway
Fallout Pu in Japanese diet 479

Pediatrics
Prenatal x rays and cancers: further tests of data from the Oxford Survey of Childhood Cancers 369
Phantom
For in-vivo measurements of internal contaminants, inexpensive and multipurpose 809
Photons
Calibration of survey instruments, in high-energy photon fields 555
Survey instrument calibration, reply to D. W. O. Rogers regarding 556
Plutonium
Absorption of ingested in newborn guinea pigs 804
DTPA therapy, effectiveness of, when administered intragastrically or intraperitoneally to remove Pu from adult or neonatal rats 641
From fallout in Japanese diet 479
Radioassay of Pu in biological samples, a low-energy photon detector for 797
Plutonium-239
Lung clearance and translocation of Pu-239 and Cm-244 in rats following inhalation individually or as a mixed oxide 633
Plutonium-241
Determination of, in low-level radioactive wastes from reactors 621
Power plant, coal-fired
Health effects of Rn and radioactive emissions (comments on life saving by nuclear activities) 551
Health effects of Rn and radioactive emissions (reply to comments on life saving by nuclear activities) 554
Radiological impact of, influence of source-term and environmental parameters on sensitivity analysis of 61
Protons
Computer simulations of nuclear reactions by, with incident energies of 250, 300 and 500 MeV in a human body 227
Public information
Manufactured products, radioactive contamination of 409

Radiation, alpha
Bone sarcoma induction, relative effectiveness of alpha emitters for 677
Radium and bone-seeking actinides, reply to Wrenn, Lloyd, Mays and Taylor concerning the carcinogenicity of 679
Risk of lung cancer at low doses of alpha particles 457
Radiation, background
Indoor exposure rate due to cosmic-ray muons, effect of partition walls and neighboring buildings on 647
Radiation, gamma
After accidental gamma irradiation from a Co-60 source, long-term follow-up 601
Computer simulations of nuclear reactions by protons with incident energies of 250, 300 and 500 MeV in a human body 227
Dosimetry using NaCl:Ba(T) thermoluminescent phosphor 127
External gamma exposure and collective external gamma exposure from testing at the Nevada Test Site, historical estimates of, test series through Hardtack II, 1958 35
Notes on Radiation Effects on Materials by J.N. Anno (book review) 387

Radiation, gamma (continued)
Photon dose build-up factors in C and polyethylene for a point isotropic source 249
Portable, intrinsic Ge gamma-ray detector, calibration and field testing of, using point sources 53
Radiation, ionizing
The Dosimetry of Ionizing Radiation (Vol. 1), edited by Kenneth R. Kase, Bengt E. Bjarngard and Frank H. Attix (book review) 683
Radiation, non-ionizing
Introduction to Magnetic Resonance Imaging by Christopher J. Morgan and William R. Hendee (book review) 149
Laser safety, nonlinear properties of optical filters--implications for 95
Laser scanning ophthalmoscopes, safety aspects of 81
Radiofrequency radiation, effects of continuous low-level exposure on intrauterine development in rats 489
Static and time varying magnetic fields, human exposure to 215
Superconducting magnetic resonance imager, ferromagnetic screening around a 545
Radioactivity, airborne
Radiological impact of coal-fired plants, influence of source-term and environmental parameters on sensitivity analysis of 61
Radioactivity, environmental
Radionuclide concentrations in Louisiana soils and sediments 239
Radon-220 concentrations in the field, a method for determining 343
Radioactivity, natural (also see all entries for radon)
Commercial aviation crewmember radiation doses, comments on 386
Indoor exposure rate due to cosmic-ray muons, effect of partition walls and neighboring buildings on 647
Radiofrequency
Effects of continuous low-level exposure on intrauterine development in rats 489
Radionuclides
Absorption of, through wounded skin 138
Radiopharmaceuticals
Health Physics Aspects of the Use of Radioiodines by David Prime (book review) 387
Radium
Bone sarcoma induction, relative effectiveness of alpha emitters for 677
Possible hazard: pressure build-up in sealed ampoules of radionuclides in aqueous solution, comment on 147
Radium and bone-seeking actinides, reply to Wrenn, Lloyd, Mays and Taylor concerning the carcinogenicity of 679
Workers in plants, measurement of Rn-220 in exhaled breath of 737
Radium-226
Building materials used in the Netherlands, radioactivity in, a proposed standard for 661
Leaching of, from U mill tailings by sulfate-reducing bacteria 509
Radium-228
In ground water, predicting the occurrence of 715
Intake by early Ra dial workers in Illinois, estimation and potential radiobiological significance of 313

Radon
Assessing the risks of Rn exposure: the influence of cigarette smoking 163
Building materials used in the Netherlands, radioactivity in, a proposed standard for 661
Determination using activated C and a high-purity Ge detector 534
Health effects of Rn and radioactive emissions (comments on life saving by nuclear activities) 551
Health effects of Rn and radioactive emissions (reply to comments on life saving by nuclear activities) 554
Radon-222 in U.S. homes and correlating factors, a national survey 175
Seasonal variation of indoor levels at a location in the southwestern United States 427
Universal Rn wave, an approach 185
Radon daughters
Decreasing in indoor air, Swedish limitation schemes 569
Radon, indoor
Calibration of charcoal detectors, Rn chamber for 135
Decreasing Rn daughters in indoor air, Swedish limitation schemes 569
Measurements in the Albuquerque, New Mexico, area 529
Radon-222 in U.S. homes and correlating factors, a national survey 175
Seasonal variation of levels at a location in the southwestern United States 427
Surface deposition of Rn-222 decay products with and without enhanced air motion 283
Radon-220
Concentrations in the field, a method for determining 343
Determination using activated C and a high-purity Ge detector 534
Measurement of, in exhaled breath of Th plant workers 737
Calibration of charcoal detectors, Rn chamber for 135
Radon-222
Concentrations in the field, a method for determining 343
In U.S. homes and correlating factors, a national survey 175
Surface deposition of Rn-222 decay products with and without enhanced air motion 283
Reactor fuel
Notes on Radiation Effects on Materials by J.N. Anno (book review) 387
Reactor, boiling water
Determination of Pu-241 in low-level radioactive wastes from reactors 621
Reactor, power
Exposure rate from airborne radioactive gases inside a nuclear reactor containment building, a Monte Carlo program to calculate the 699
Reactor, pressurized water
Determination of Pu-241 in low-level radioactive wastes from reactors 621
Reactors
Physics and Technology of Nuclear Materials by Ioan Ursu (book review) 388

Relative biological effectiveness
Bone sarcoma induction, relative effectiveness of alpha emitters for 677
Radium and bone-seeking actinides, reply to Wrenn, Lloyd, Mays and Taylor concerning the carcinogenicity of 679
Respiratory system
Animal inhalation studies, generation of Li combustion aerosols for 117
Concentrations of Pb-210 and its states of equilibrium with U-238, U-234 and Th-230 in U miner's lungs 501
Decorporation of Sr-85 by radioabsorbents from the lungs of rats with bronchial disorders 539
Deposition and early disposition of inhaled $^{233}UO_2(NO_3)_2$ and $^{232}UO_2(NO_3)_2$ in the rat 755
Inhaled Co aerosols in beagles, metabolic fate of 773
Risk analysis
Generic probabilistic risk analysis for a high-level waste repository 519
Health and Environmental Risk Assessment, edited by P.F. Ricci and M.D. Rowe (book review) 150
Health effects of Rn and radioactive emissions (comments on life saving by nuclear activities) 551
Health effects of Rn and radioactive emissions (reply to comments on life saving by nuclear activities) 554
Models, risk projection, of radiation carcinogenesis; and distribution functions, cumulative empirical 447
Radon exposure, assessing the risks of, the influence of cigarette smoking 163
Risk of lung cancer at low doses of alpha particles 457
Rodents
Absorption of ingested Pu and Am in newborn guinea pigs 804
Attaching thermoluminescent dosimeters to small mammals, an alternative technique for 245
Decorporation of Sr-85 by radioabsorbents from the lungs of rats with bronchial disorders 539
Deposition and early disposition of inhaled $^{233}UO_2(NO_3)_2$ and $^{232}UO_2(NO_3)_2$ in the rat 755
DTPA therapy, effectiveness of, when administered intragastrically or intraperitoneally to remove Pu from adult or neonatal rats 641
Neptunium-237 inhalation in rats 745
Radiofrequency radiation, effects of continuous low-level exposure on intrauterine development in rats 489

Safety standards
Concepts of Collective Dose in Radiological Protection by Bo Lindell (book review) 251
ICRP dose limitation recommendations, a study of worker dose distributions with respect to 579
Intake and committed dose equivalent, comparison of, based on annual dose equivalent and committed dose equivalent for a nuclide of intermediate effective half-life 207
Laser safety, nonlinear properties of optical filters--implications for 95
Laser scanning ophthalmoscopes, safety aspects of 81

Safety standards (continued)
Limitation schemes, Swedish, to decrease Rn daughters in indoor air 569
Possible hazard: pressure build-up in sealed ampoules of radionuclides in aqueous solution, comment on 147
Radioactivity in building materials used in the Netherlands, a proposed standard for 661
The Radman Guide to the Ionising Radiations Regulations--1985 by J.C. Collins, A.M. Freke, R.G.C. Brix, S.K. Stephenson (book review) 388
Shielding
Energy dependence of the dose equivalent on the primary proton energy--comparison of Casim and Moyer model calculations 812
Iron, study of neutron leakage through, at an accelerator 723
Soil
Radionuclide concentrations in Louisiana soils and sediments 239
Source term
Radiological impact of coal-fired plants, influence of source-term and environmental parameters on sensitivity analysis of 61
Spectrometry, gamma
Counting losses in, not eliminated by Dead-time correction circuitry 380
Spectroscopy
Introduction to Magnetic Resonance Imaging by Christopher J. Morgan and William R. Hendee (book review) 149
Statistics
Applied Extreme Value Statistics by Robert R. Kinnison (book review) 251
Strontium-85
Decorporation of, by radioabsorbents from the lungs of rats with bronchial disorders 539
Survey meter
Calibration tardiness alarm for a 382
Sweden
Decreasing Rn daughters in indoor air, Swedish limitation schemes 569

Tailings
Design of dry or semi-dry U tailings disposal, radiation data input for 329
Thorium
Workers in plants, measurement of Rn-220 in exhaled breath of 737
Thorium-232
Predicting the occurrence of Ra-228 in ground water 715
Thyroid
Health and safety aspects of nuclear weapons testing, historical perspectives on selected, review article 17
Lowering the annual limit on intake for I-125 and I-131, more comments on 682
Should the annual limit on intake for I-125 and I-131 be lowered, comments on 682
Transport, environmental
Attaching thermoluminescent dosimeters to small mammals, an alternative technique for 245
Fallout Pu in Japanese diet 479
Neptunium-237 in human tissue samples 665

Transport, environmental (continued)
Radiological impact of coal-fired plants, influence of source-term and environmental parameters on sensitivity analysis of 61
Radionuclide concentrations in Louisiana soils and sediments 239
Risk analysis, generic probabilistic, for a high-level waste repository 519
Uranium mine near Val Vedello, Italy; pre-operational survey of 197
Tritium
Comparison of the counting characteristics of two liquid scintillation cocktails 667
Generating Li combustion aerosols for animal inhalation 117
Incineration and monitoring of low-level wastes at a biological research institution 469
Tumors (see **neoplasms**)

United Kingdom
The Radman Guide to the Ionising Radiations Regulations--1985 by J.C. Collins, A.M. Freke, R.G.C. Brix, S.K. Stephenson (book review) 388
Uranium
Activity median aerodynamic diameters, final product dust, in the product packing areas of two Australian U mills 352
Airborne UO_2 dust, determination of particle size for, at a fuel fabrication work station and its implication on the derivation and use of ICRP Publication 30 derived air concentration values 97
Deposition and early disposition of inhaled $^{233}UO_2(NO_3)_2$ and $^{232}UO_2(NO_3)_2$ in the rat 755
Health effects of Rn and radioactive emissions (comments on life saving by nuclear activities) 551
Health effects of Rn and radioactive emissions (reply to comments on life saving by nuclear activities) 554
Histopathologic findings of lung cancer in Navajo men: relationship to U mining 365
Inhalation, acute accidental, of; a 38-year follow-up 609
Uranium mill tailings, leaching of Ra-226 from, by sulfate-reducing bacteria 509
Uranium dioxide
Airborne UO_2 dust, determination of particle size for, at fuel fabrication work station and its implication on the derivation and use of ICRP Publication 30 derived air concentration values 97
Uranium mining
Concentrations of Pb-210 and its states of equilibrium with U-238, U-234 and Th-230 in U miner's lungs 501
Design of dry or semi-dry U tailings disposal, radiation data input for 329
Histopathologic findings of lung cancer in Navajo men: relationship to U mining 365
Uranium mill tailings, leaching of Ra-226 from, by sulfate-reducing bacteria 509
Uranium mine near Val Vedello, Italy; pre-operational survey of 197

Waste disposal
Design of dry or semi-dry U tailings disposal, radiation data input for 329

Waste disposal (continued)
Determination of Pu-241 in low-level radioactive wastes from reactors 621
Incineration and monitoring of low-level H-3 and C-14 wastes at a biological research institution 469
Liquid scintillation counter design eases vial disposal problems 385
Risk analysis, generic probabilistic, for a high-level waste repository 519
Uranium mill tailings, leaching of Ra-226 from, by sulfate-reducing bacteria 509
Waste, low-level
From reactors, determination of Pu-241 in 621
Incineration and monitoring of low-level H-3 and C-14 wastes at a biological research institution 464
Water, fresh
Predicting the occurrence of Ra-228 in 715
Uranium mine near Val Vedello, Italy; pre-operational survey of 197
Weapons
Nuclear weapons testing, health and safety aspects of, historical perspectives on selected, review article 17
Testing at the Nevada Test Site, historical estimates of external gamma exposure and collective external gamma exposure from, test series through Hardtack II, 1958 35
Whole-body counting
Calibration phantom, inexpensive and multipurpose, for in-vivo measurements of 809
Health and safety aspects of nuclear weapons testing, historical perspectives on selected, review article 17

x rays
Prenatal x rays and cancers: further tests of data from the Oxford Survey of Childhood Cancers 369
Xenon-133
Absorbed dose rates, measured, from semi-infinite hemispherical volumes of 107

Yugoslavia
Titles and authors of papers presented at the meeting of the Health Physics Section of the Roland Eotvos Physical Society of Hungary--Computer-aided Methods in Radiation Protection, 22-25 October 1985, Budapest 391
